

Background

At the October meeting of the Town Council regarding the item to replace the Classic Climber the following resolution was taken “ **to consult with St Peters School to seek the views of students on the equipment selected and make a decision at the October meeting of the Council.**”

All of key stage 2 children were consulted (approx. 240) and the results were that

Item 1 Agito Corro

Comments - didn't like the straight lines, it looked small and too high.

(actual height 3m – same as existing item)

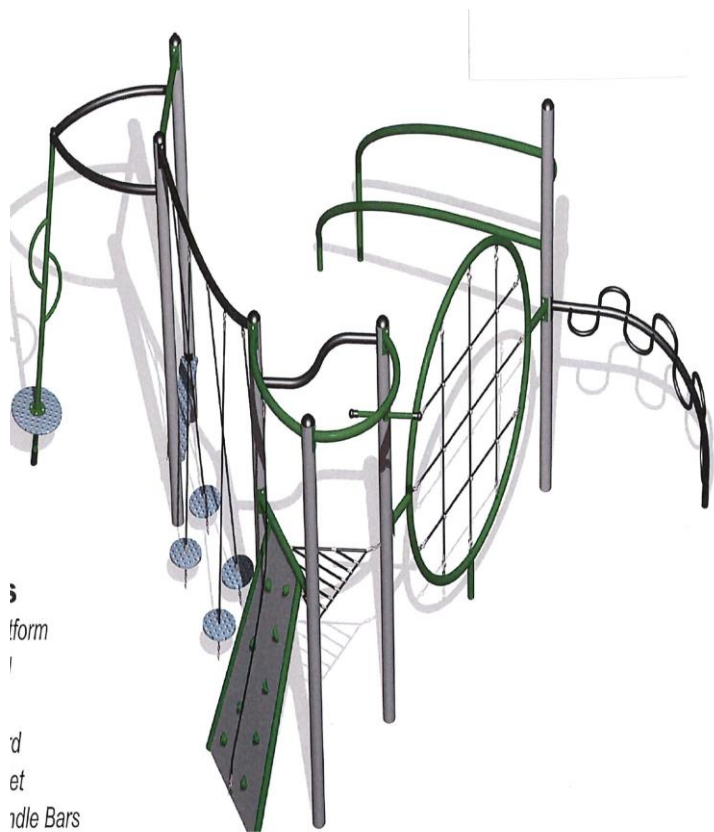

Manufactured in Poland

Item 2XS Cyclone

Comments - it was too similar to what is there now.

Manufactured in the UK

Item 3 Quest Nemesis

Comments They all loved it and said it is great because it looks like an obstacle course.

Manufactured in the UK

Staff Comment

All items have their merits, the only concern the staff have about the selection of the preferred item is that there are already two similar items of equipment on the recreation ground next to where the new item is to be located. Pictures below of existing items

Decision needed

For Council to select the piece of play equipment to be installed to replace the Classic Climber

Agenda item 10b**Quotes for play equipment**
